APPLICANT : FUJITSU GENERAL LTD;

INVENTOR : SHOJI SHUNICHI;

INT.CL. : H04B 7/26

TITLE : CALLING DEVICE

ABSTRACT : PURPOSE: To call a specific person or group by receiving either a different individual calling code and/or a calling code of a specific group and a common group and giving the said code to a transmitter.

CONSTITUTION: A card receiver A whose identification code of an internal decoder 9 differs from the receiver is given to plural persons, a prescribed code is inputted by a transmitter B and a call button 23 is being depressed, then the decoder 9 of the receiver A reacts thereupon to open its gate 10. In speaking a prescribed message toward a microphone 24 of the transmitter b while depressing the call button 23, the content is reproduced from a speaker 4 of the receiver A thereby delivering the message from the transmitter B to a person only having the receiver A. If the decoder 9 is so designed that the receiver can identify the group code in addition to the code assigned to itself, the group calling is attained. Thus, a specific person or a specific group can be called.
